

A word about Calculators!

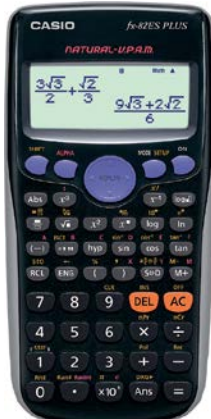

In year 9 – 11 the scientific calculator is a very effective tool.

We recommend the Casio fx-82 AU Plus

As your daughter moves into Year 12 and 13 the graphics becomes invaluable – indeed she will be disadvantaged if she does not have one. The choice is the Casio fx-9750 GII.

Of course you can choose to purchase the Graphics Calculator in Year 9; it will prove to be a good investment.
